FOOD WASTE PREVENTION IN THE WORKPLACE

The food we throw away is a waste of valuable resources - it is expensive to buy and dispose of.

Food has a high carbon footprint in that energy is used to grow, harvest, transport, process, package, prepare and retail it.

Remember each tonne of food waste has a monetary value of between €2,000 - €3,000.

DRAMHAÍL BIA A CHOSC SAN ÁIT OIBRE

Is cur amú acmhainní luachmhara é an bia a chaithimid amach, mar go bhfuil sé daor le ceannach agus le diúscairt.

Tá lorg carbóin ard ag bia mar gheall ar an méid fuinnimh a thógann sé chun é a fhás, é a shaothrú, a iompar, a phróiseáil, a phacáistiú, a ullmhú agus a dhíol. Meastar go gcosnaíonn gach tonna de dhramhaíl bia idir €2,000 - €3,000.
