Amount payable to end of Quarter £ 886.2.9

BALLINASLOE RURAL DISTRICT COUNCIL

County Surveyor's Report for Quarter ending 30th June 1909

The Report of the Assistant Surveyor on the condition of your roads are generally favorable: the amounts due for a strike-off are consequently small. The reports deal mostly with the latter portion of the quarter: in the future, particularly of the main roads, defects which have come under my notice are:—rough, bare surfaces and striking evidence of late spreading. These would appear to indicate both a scarcity of metal and of time: I would therefore earnestly impress on your contractors how much of the year's road depends on their timely exertions in July and August. The amount of metal will compare at the specified time, September 1st, and in being away with late spreading—there will be no late repairs. The public works are generally in fair order: of these but large works needing repair the contractors concerned shall get during the present quarter.

The Quarter now read is not yet completed, and in general feet under the specified width of cartways. Some of the cartways used is not suitable.

County Surveyor's applications are for renewals of three maintenance contracts (Nos 9, 10, and 11). The term in each of the supply of metal will be extended to 1st November 1909.

Of the other BALLINASLOE RURAL DISTRICT COUNCIL.

County Surveyor's Report for Quarter ending 30th June 1909.

No 51.- Plan and section showing extent of cutting not deposited.  
Cost will depend much on the possibility of getting space for excavated stuff.

Mr Chairman and Gentlemen,

The reports of the Assistant Surveyor on the condition of your roads are generally favourable: the amounts deferred or struck-off are consequently small. The reports deal mostly with the latter portion of the quarter: in the future, monthly inspections as far as possible will be made, particularly of the main roads. Usual defects which have come much under my notice are:- rough, bare surface, and striking evidence of late spreading. These would appear to indicate both a scarcity of metal and of time: I would therefore earnestly impress on your contractors how much of the year's road working depends on their timely exertions in July and August. The measurement of metal will commence at the specified time, September 1st, and to assist in doing away with late spreading - there will be no late measurements.

The public works are generally in fair order: of these bridge range walls needing repair the contractors concerned shall get due notice during the present quarter.

The Clonfert new road is not yet completed, and is generally three feet under the specified width of carriageway. Some of the material being used is not suitable.

County Surveyor's applications are for renewals of three maintenance contracts (Nos 9, 10, and 111). The term in each case for the supply of metal will be extended to 1st November 1909.

The following Letters from the Local Government Board for Ireland and others were read by the Clerk, and directions given to answer them respectively, to the following effect (or orders made on them respectively, as follows):-
