Co. Reg. No. 42654 - Registered Office: Fairgreen House, Fairgreen Road, Galway H91 AXK8, Ireland.

This Waste Facility Permit is being sought to ensure compliance with the regulations for the operation of the facility as granted planning permission under Planning Ref No 16/1286.

We have consulted with the NPWS and had discussions with Galway County Council. We trust the enclosed is to your satisfaction covering the documents and studies as requested in order to bring this facility in to use and therefore provide sustainable use of a site with full planning permission in order to provide sustainable transport of waste.

This is a new application with an updated NIS considering previous comments and addressing the issues raised.

The move to a circular economy, is essential if we are to make better use of our resources and become more resource efficient. The waste transfer site has the potential to play a leading role in the development of the circular economy in the local area. The current application comprises of a waste transfer facility. It is considered that the proposed waste permit will establish an integrated and effective waste transfer site, consistent with the government policy, national waste management plan 2020-2025, current waste management plans and the waste management act.

The proposed waste permit represents an opportunity to contribute towards Ireland's obligations under the EU Landfill Directive to divert waste from landfill and provide more sustainable transport of waste accordingly.

We trust that this new application will allow for the use of a site with full planning permission. Please do not hesitate to contact us should you wish to discuss anything or should there be any queries.

Yours faithfully,

Brendan Rudden
